PROJECTS

- **CollegeGram — Social + Academic Platform for Students** GitHub | Live
 - Built a full-stack platform combining discussion forums, social posts, and academic note sharing.
 - Designed REST APIs and handled backend logic using Node.js, Express, and MongoDB.
 - Implemented authentication and dynamic feed system for user-specific content.
- **IPL Winner Prediction Model** GitHub
 - Developed a machine learning model to predict match outcomes using IPL dataset (15+ seasons).
 - Performed feature engineering and trained models achieving **78%+ accuracy**.
 - Built preprocessing pipeline using Pandas, NumPy and Scikit-learn.
- **Anti-Cheat System for Online Coding Platforms** GitHub
 - Designed a plagiarism detection system using code similarity algorithms and behavioral signals.
 - Implemented detection for structural similarity, submission timing anomalies, and repeated patterns.
 - Built scalable backend system to process concurrent submissions efficiently.

TECHNICAL SKILLS

- **Languages:** C++, Java, Python, JavaScript
- **Technologies:** React.js, Node.js, Express.js, Flask, MongoDB, SQL, Pandas, NumPy, Scikit-learn
- **Tools:** Git, GitHub, Postman, VS Code
- **Core Concepts:** Data Structures & Algorithms, OOPS, DBMS, OS, Computer Networks

POSITIONS OF RESPONSIBILITY

- **Junior Core, CodeIO — BMSCE**
 - Organized and conducted technical workshops on programming and development concepts.
 - Contributed to planning and execution of student-focused coding sessions and events.
- **Junior Coordinator, Protocol Club — BMSCE**
 - Coordinated and managed multiple technical and fun events including coding competitions and codeathons.
